

A PRACTICAL ROUTINE FOR YOUR NEXT SESSION

The 5-minute rudiment reset

One pattern. A comfortable starting tempo. A clean result to return to tomorrow.

PICK -> PLAY -> ADJUST -> LOG

- 01** Choose one rudiment
- 02** Practice a short tempo ladder
- 03** Write down your clean tempo

You can use this guide with a practice pad and any metronome. RudiRise can run the changing beat and keep your result in the app. The routine here is a practice suggestion, not a guarantee of speed or improvement.

What is inside

A timed routine, three sticking patterns, a simple tempo method, and a printable seven-session practice log. R = right hand. L = left hand.

SET A FIVE-MINUTE TIMER

A short session with a finish

0:00-1:00

Settle the pattern

Choose one pattern from page 3. Start slowly enough to keep your grip relaxed and the spacing even. Stop if you feel pain.

1:00-2:30

Hold your starting tempo

Repeat the pattern at a comfortable metronome setting. Aim for similar volume in both hands; do not rush to increase the number.

2:30-4:30

Try a small ladder

If the pattern feels consistent, increase by a small amount, for example 2-5 BPM. Repeat or reduce tempo if the playing becomes uneven.

4:30-5:00

Return and record

Finish at a comfortable, repeatable setting. Write the rudiment, clean tempo and one observation in the log. That is a starting point, not a grade.

Adapt the timing to your comfort. Take breaks as needed.

PATTERNS FROM THE RUDIRISE LIBRARY

Pick one. Keep it simple.

Single Stroke Roll

R L R L R L R L

Alternate hands. Listen for even spacing and a balanced sound.

Double Stroke Open Roll

R R L L R R L L

Use two strokes with each hand. Keep the second stroke controlled.

Single Paradiddle

R L R R | L R L L

An alternating lead followed by a double. The bar separates the two halves; it is not a rest.

These are sticking reminders, not full musical notation. Decide the subdivision and accents before you play. Practice at a volume and pace that stay comfortable.

THE APP METHOD, WITHOUT THE HYPE

Your clean-tempo ladder

1. Pick a comfortable starting BPM

A clean tempo is one you judge to be even, controlled and repeatable. It is personal; a fast number is not automatically a good result.

2. Choose a small step

Try a 2-5 BPM increase as a starting experiment. Hold each step long enough to assess the pattern. Use smaller steps or no increase when needed.

3. Make an honest decision

PASS: the step feels clean. REPEAT: stay at this step for another attempt.

TOO FAST: reduce the pace. RudiRise does not listen to or score your strokes automatically.

4. Save a useful result

Record a clean tempo you can return to. In RudiRise, the changing metronome, manual decisions and saved practice history form one workout.

RudiRise on iPhone

The starter library is free. Premium unlocks the full rudiment library, custom ladders and full history. Check current terms and prices in the app.

Open RudiRise in the App Store ->

PRINT THIS PAGE OR FILL IT BY HAND

Your seven-session practice log

Record what you actually played. A lower, more comfortable tempo can be a useful result. This log is not a test or a promised seven-day program.

Date	Rudiment	Start BPM	Clean BPM	One observation

Next session, I will:
